CB6 Transportation Committee Agenda

Feb 25, 2026

- Committee updates, recap (5 min):
    - Last meeting recap
        - Doug: 5th Ave BID presentation
        - Tony: Presentation on safety and traffic issues on Bergen St. and the potential impacts of the Flatbush bus redesign
    - Most recent actions by the committee (Tony will summarize)
        - Letter to DOT in support of adding traffic signals and daylighting in the Columbia St. Waterfront area
        - Resolution in support of the Ride Safe Right Right bill, Intro 1380, which did not pass last session, restricting sales of e-bikes that go faster than 20mph. We also supported a consistent citywide speed limit of 20mph for bikes and micromobility vehicles.
- Possible resolution to consider: CB6 Slow Zone (5-10 min, Tony/Kevin)
    - Kevin LaCherra of Make McGuinness Safe suggests we consider a resolution to ask DOT to make CB6 a Slow Zone under Sammy's Law, with a speed limit of 20 MPH on all applicable streets.
    - Brooklyn CB1 and Queens CB2 have passed resolutions. Kevin will present these slides for us to consider
    - Discussion, public comment, and vote on resolution language if committee wishes to proceed
    - Resolution passed unanimously with 1 abstention for cause.
        - Recognizing CB6's commitment to safer streets and support for Sammy's Law, we recommend that NYC DOT institute a district-wide 20 MPH slow zone on all applicable streets, and adjust signal timing to reflect the new limit, with camera enforcement.
          We also call for adoption of a citywide speed limit of 20mph on all applicable streets.
- Guest: Megan Flynn and Anthony Drummond from MTA (20-25 min)

- Introduction and MTA updates
- Requests from committee to MTA (for her to look into and get back to us, she probably won't have answers tomorrow):
  - Flatbush B41 bus plan: Any changes to plan presented in late 2025?
    - Advocates have suggested swapping B45 and B63 routes W of Flatbush & Atlantic, which eliminates the B63 left-turn conflict with the new B41 lane and eliminates the need to re-route the B63 onto Bergen and Dean Streets.
    - Advocates have also suggested raised platforms to allow level boarding for buses, which could increase accessibility and speed bording for all users
  - R train service: Senator Gounardes and community advocates have pushed for more frequent service on the R train, especially on weekends.
  - Alan: is it possible to add an arrival clock for buses at Smith-9th
  - Ken: to add additional service for R train riders on weekend, could we run the N local from 59th St to Atlantic?
- Community questions or feedback for Megan

- Preliminary analysis of the submissions to our Street Safety Issue Report form (10 min, Alan Mukamal – Marc or others who have looked at the form results can chime in too)
  - Add a Q how people heard about the form
- New business to consider at future meetings (10 min)
  - Ask a DOT rep to come to our next meeting, topics:
    - 1: Columbia St. safety improvements
      - What can be done about BQE
    - 2: Carroll St. Bridge
    - Plans for implementing daylighting, loading zones, slow zones, and other safety priorities in CB6
    - Safety priority areas according to our street safety form
    - Options for a northbound protected bike route to complement the new Court St. bike lane?

        - Ask DOT to present findings on Court St. 1 year out (in October?)
    - Send a letter ASAP to DOT asking about Carroll Street bridge re-opening — exploring possibility of a re-design
- Borough Pres is working on a residential parking permit study. Rachel Weinberger presented about this in the past
- Prospect Park Alliance update in March
    - Revisit low-traffic neighborhoods proposal?
        - Open Plans is presenting on March 3
- Send a letter to DOT asking about timeline for 5th Ave — Derek Walker is new community liaison
- Ask Council Members about Returning traffic enforcement to DOT?
    - Other suggestions from committee and community
